CASE STUDY
Asgard Labels: Revolutionizing Label Printing for Acumatica

AT A GLANCE

Challenges

- Issues between data transfer and label due to 3rd party integration
- Complex environment to design labels
- Lack of industry specific barcode coverage
- Lag between implementation time and printing

Benefits

- Direct integration into Acumatica
- Print Electronic industry 2D in our labels and packing slip
- Efficient time management through quick printing process

ADAM TECH

A worldwide manufacturer of electromechanical components and cable assemblies, is looking for a label solution capable of not only printing labels quickly and smoothly but also seamlessly utilizing data pulled directly from their Acumatica system.

OBJECTIVES

- Find a label solution capable of printing labels quickly and smoothly using data pulled from Acumatica
- To have a solution that allows you to design labels with ease.
- Acquire software capable of printing industry-specific barcodes effectively.
- Add 2D Barcode to the parking slip report

SOLUTIONS

Asgard Labels is an Acumatica solution that allows users to define and print labels from any Acumatica screen in a matter of minutes. The solution is fully integrated within Acumatica, allowing users to map any data field, or system data to a label. Asgard Labels gives users the liberty to design and define their own label model templates for printing and rendering.

Label models can be mapped to any screen in Acumatica (including generic inquiries). Asgard Labels supports ZPL compatible printers; hence, is able to print industry-specific barcodes.

RESULTS

Direct integration into Acumatica Cloud ERP

No external applications or integrations.
Create labels using data from our system: fast, reliable and up to date.

Print from any Acumatica screen

Design and preview our label models in Acumatica and map them to shipment screen.

Efficient time management through quick printing process

Print labels in Acumatica with the Nb of copies that we need in a click of a button

Print any Industry Specific labels in any size

Print Electronic industry 2D in our labels and packing slip
