- Mobile-enabled via browser and application

BUSINESS BENEFITS

- Increased visibility
- Certified quality products
- Reduced rework costs
- Stringent standards compliance
- Streamlined operations
- Improved supplier quality and coordination
- Better collaboration
- Higher customer satisfaction
- Enhanced company / brand reputation

Comprehensive Quality Management features natively built within Acumatica

QUALITY MANAGEMENT SUITE FOR ACUMATICA FEATURES

Feature	Description
Quality Testing	Perform end-to-end QC testing on receiving raw materials, production (in-process and at completion), shipping, kitting, ad-hoc and RMA QC.
Checklists & Inspections	Execute inspection plans, checklists, and QC tests against products, people, and equipment.
Certificate of Analysis (COA)	Generate COA and production deviation documents and reports.
NC & CAPA	Track non-conformances (NC), perform root cause analysis, manage corrective and preventive action (CAPA) processes and maintain complete audit trail.
AQL & Sampling	Carry out 100% inspection or sampling routines (AQL and non-AQL).
Traceability and Recall Notices	Implement forward and backward tracing of all movements of a serial or lot number.
Packaging Bills of Material	Assign QC tests to sub-assemblies and finished goods that are executed and validated during production.
Lot-Based Quality Control	Perform quality control testing based on individual lots.
Assign Analysts	Assign appropriate QC orders and QC tests to respective analysts.
Mobile Data Collection	Conduct QC and capture data from any location via mobile and web.
Reporting & Analytics	Report with user-friendly and pre-built reports for vendor, production, and stability analytics.
Education & Training (roadmap)	Manage the training process and keep employee and training records organized, up-to-date, and compliant.
Supplier/Vendor Management (roadmap)	Evaluate, score, and summarize the activity and performance of your suppliers/vendors.
Audit Management (roadmap)	Support the complete audit from beginning to end in compliance with corporate standards and industry regulations.
Health and Safety (roadmap)	Store, manage, and access required health and safety records.

KEY CAPABILITIES

- Gain anytime, anywhere control over quality-related issues
- Ensure the step-by-step completion of QC tests
- Monitor materials in real time to maintain quality and compliance
- Ensure timely process tracking with automated workflows
- Define QC tests for formulas, raw materials, intermediates, kit assembly, suppliers, customers, and finished goods
- Establish embedded library of standardized QC tests, control plans, and compliance documentation
- Execute inspection plans, checklists, and QC tests against products, people, and equipment
- Auto assign lot statuses and disposition lots, based upon QC results
- Analyze QC tests by item, lot, job, and vendor
- Improve auditing capabilities
- Support NC & CAPA processes
