AI-Powered Forms for Acumatica

JigxForms

JigxForms brings AI-powered form creation directly into your Acumatica environment.

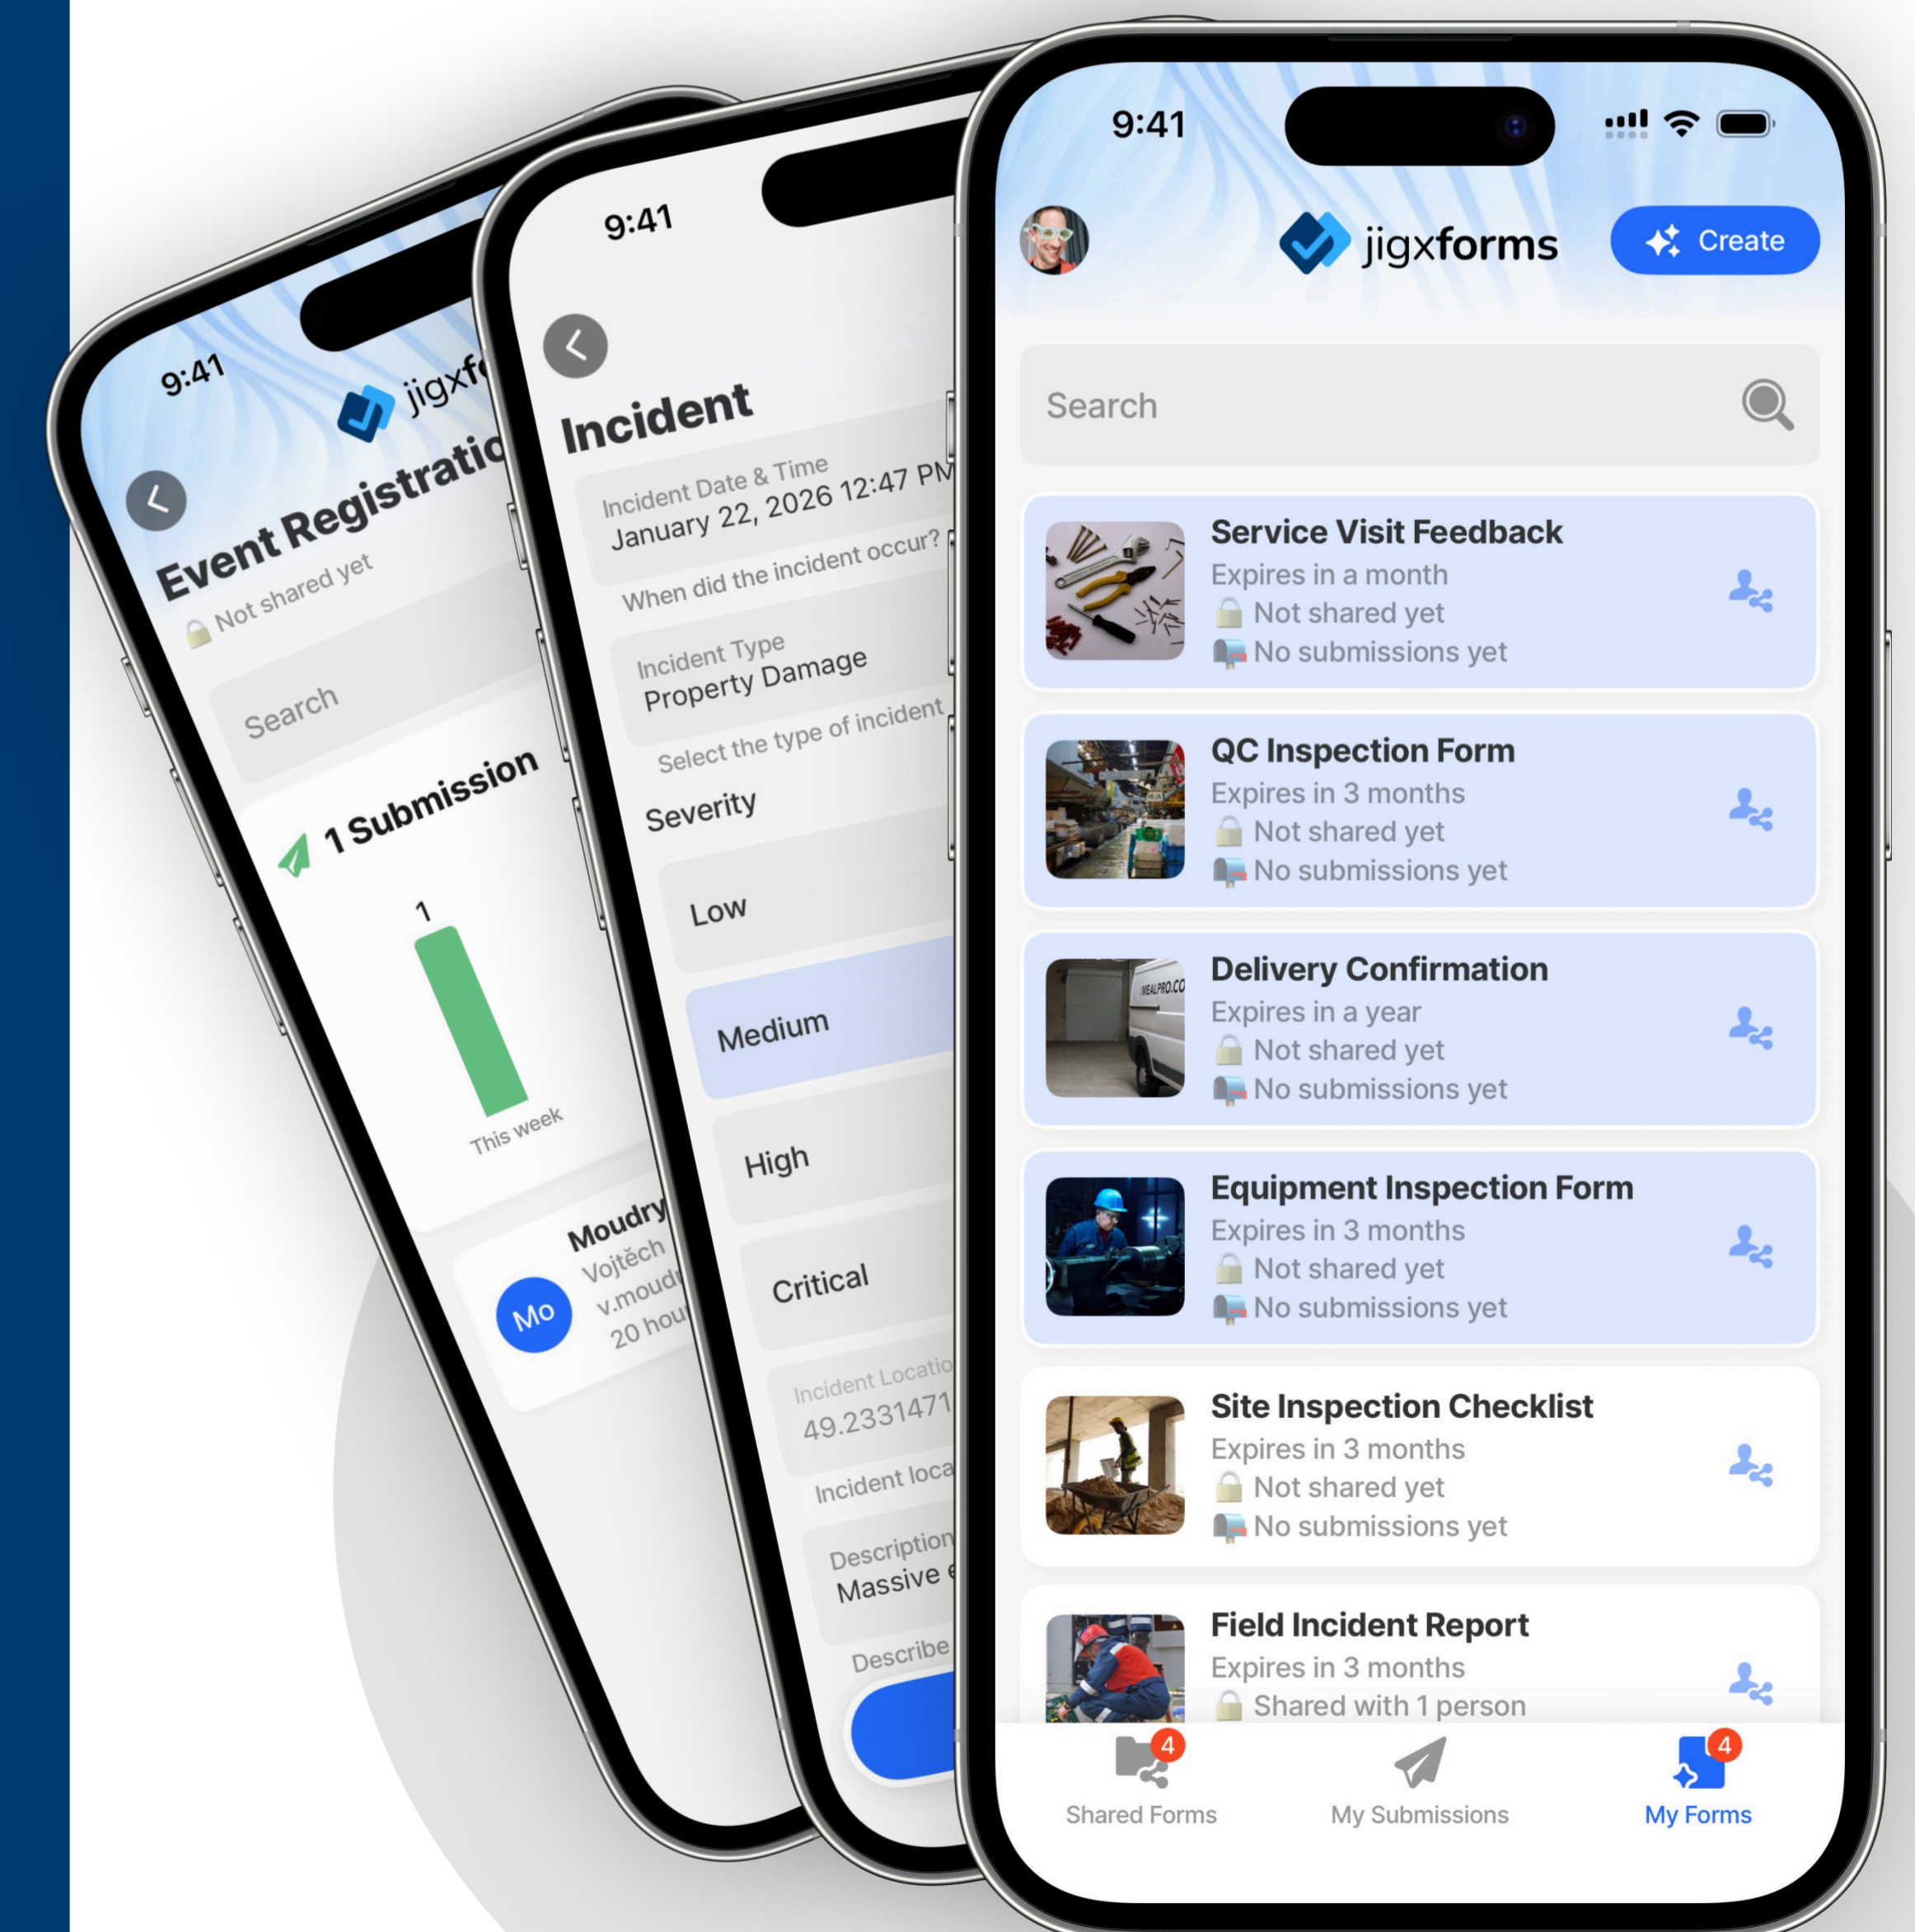

Turn text prompts, PDFs, and images into fully functional mobile forms — instantly deployable to frontline teams and fully integrated with Acumatica.

Core Capabilities

- AI Form Builder – Generate mobile forms from text, documents, or images
- Browser & Mobile Creation – Build and manage forms in the browser or the app
- Real-Time Data Capture – Collect structured data from technicians, reps, or customers
- Acumatica Integration – Sync submissions directly to ERP records
- File & Photo Attachments – Capture documents and images in the field
- Instant Deployment – Publish forms instantly without app store updates

Business Impact

- Deploy new forms in minutes, not weeks
- Improve data accuracy and compliance
- Increase operational efficiency across departments
- Enhance visibility with structured, real-time data
- Support scalable growth with configurable workflows

Why JigxForms for Acumatica?

- ✓ Accelerate digital transformation without custom development
- ✓ Eliminate paper-based processes and manual re-entry
- ✓ Empower frontline teams with customizable mobile workflows
- ✓ Maintain centralized control through secure ERP integration
- ✓ Reduce IT overhead with AI-assisted form creation
