

MAINTENANCE MANAGEMENT

What if you had the means to optimize the maintenance of your machinery and infrastructure?

Just imagine an automated system that streamlined the logistics around the maintenance lifecycle, whether it's planned or an unplanned incident.

LLUMIN CMMS+ DOES IT FOR YOU. LLumin CMMS+ is ultimately flexible and expansive. In other words, it manages any type of work that requires notification, preparation, action and follow up. When it comes to maintenance, LLumin CMMS+ offers easy to use utilities that create and manage recurring work schedules, listing out all needed skills, procedures, instructions, and necessary supplies at the time of work.

Automated notifications & escalations

Process improvement tools

Comprehensive resource & logistics coordination

Mobile workforce optimized

Minimize time to "asset ready"

What's more, LLumin will help you improve response times and activity follow-up. Especially for service requests or other unplanned work, LLumin workflow automatically notifies and routes demand to the proper team and resource.

The goal of any maintenance management team is to ensure optimal work efficiency and minimize MTTR cycles. With LLumin CMMS+, optimization and elevation of all your critical KPIs is now possible.
